

Graduate Research iThenticate Procedure

Section 1 - Purpose

- (1) This Procedure specifies the procedure for:
- the submission of text-based research outputs by Graduate Research (GR) students (including but not limited to: research proposal, draft manuscripts and theses prior to examination) to iThenticate;
 - the assessment and interpretation of iThenticate similarity percentages and originality reports by Principal Supervisors; and
 - the management of potential Plagiarism in the research outputs of GR students.
- (2) This Procedure supports the [Graduate Research Thesis Preparation, Submission and Examination Policy](#).

Scope

- (3) This Procedure applies to all:
- Graduate Research students enrolled at Macquarie University;
 - Supervisors as defined in the [Graduate Research Supervision Policy](#); and
 - other Macquarie University academic and professional staff providing academic and/or administrative support to GR students.

Section 2 - Policy

- (4) Refer to the [Graduate Research Thesis Preparation, Submission and Examination Policy](#).

Section 3 - Procedure

Responsibilities and Required Actions

Academic and Research Integrity

(5) All researchers (including but not limited to GR students and their supervisors) are responsible for adhering to the principles of academic and research integrity. Roles and responsibilities of researchers in maintaining and managing academic and research integrity are specified in the [Academic Integrity Policy](#), the [Macquarie University Code for the Responsible Conduct of Research](#) (Macquarie University Research Code) and its accompanying standards. The appropriate use of Generative Artificial Intelligence (GAI) in research is specified in the [Using Generative AI in Research Guidance Note](#).

Plagiarism Management Framework

Initial Training in Academic Honesty

(6) Commencing GR students are required to undertake the Graduate Research Induction offered online by Macquarie

University. As part of this program, a module on academic integrity must be completed.

Preliminary Appraisal using iThenticate During Confirmation of Candidature

(7) At the time of Confirmation of Candidature (CoC), or equivalent, students are required to submit their research proposals to their Principal Supervisor for submission to iThenticate. This tool will generate an originality report and will determine a similarity percentage based on the proportion of the proposal that is matched to internal or external sources.

(8) The Principal Supervisor must assess the similarity percentage and the originality report generated in iThenticate and use their academic judgement to determine whether the text-matches indicate a problem with originality that needs to be addressed.

(9) There are no standard or ideal maximum or minimum similarity percentages applicable across all research outputs and disciplines. Even a document with a low overall similarity percentage could contain plagiarised text that needs to be further scrutinised or addressed.

(10) When the similarity percentage and the originality report indicates instances of text-matching for the proposal submitted for the CoC, or equivalent, the Principal Supervisor must discuss the extent and nature of the matches with the student and specify the next stages of dealing with the matter in line with the text matching outcomes below.

Submission of GR Thesis

(11) In accordance with the [Graduate Research Thesis Preparation, Submission and Examination Policy](#), students must submit their research thesis to their Principal Supervisor for submission to iThenticate. This tool will generate an originality report and will determine a similarity percentage based on the proportion of the thesis that is matched to internal or external sources. The Principal Supervisor will assess the similarity percentage and originality report using their academic judgement, in line with the text matching outcomes below.

Text-Matching Outcomes

(12) If the text-matching is deemed low to minor, or appears to be inadvertent/unintentional due to commonly used standard phrases or errors such as poor paraphrasing, the instances of text-matching can be addressed with the student. The final version of the proposal with the CoC, or equivalent, or the thesis, must then be forwarded to the Research Training (RT) Director/Master of Research (MRes) Advisor, or nominee, and to the Faculty for approval or endorsement.

(13) If the text-matching is deemed to be medium overlap with previous work and/or suggestive of a problem with the originality of the writing, the student will be counselled by the Principal Supervisor (and/or Associate Supervisor) and RT Director/MRes Advisor, or nominee, and provided information about appropriate incorporation and acknowledgement of the ideas and words of others. A written record of the counselling provided to the student should be kept by the Principal Supervisor and/or RT Director/MRes Advisor. The student will then be asked to rewrite the relevant sections of their proposal or thesis prior to resubmission to iThenticate. Pending resolution of any minor text-matching, the revised document must then be forwarded to the Faculty for approval. If the text-matching persists as medium, the document will be treated as having major text-matching.

(14) If the text-matching is deemed to be major (or continues to be medium after initial counselling was provided) the Principal Supervisor (and/or Associate Supervisor) will inform the RT Director/MRes Advisor, or nominee, who will refer the matter to the Associate Dean, Research Training and Performance (RTP) of the Faculty (Research Integrity Advisor), or nominee, in cases where a conflict of interest may exist. The Associate Dean, RTP, or nominee, has the discretion to determine whether a case requires referral to the Research Integrity Office for possible management in accordance with the [Macquarie University Research Code Complaints, Breaches and Investigation Procedure](#) (the

Research Code Procedure). Any referral should be accompanied by a record of prior counselling provided to the student regarding text-matching (where applicable).

(15) Cases referred for possible management under the Research Code Procedure may be assessed as a potential breach of the [Macquarie University Code for the Responsible Conduct of Research](#). Where a suspected breach is identified, the matter may result in a formal investigation being conducted in accordance with the Research Code Procedure.

(16) If research misconduct or a serious breach of the [Macquarie University Code for the Responsible Conduct of Research](#) is substantiated, the matter may be referred to the University Discipline Committee (per the Student Discipline Procedure) and the student may be subject to sanctions, which may include having their candidature and/or scholarship terminated.

Section 4 - Guidelines

(17) Nil.

Section 5 - Definitions

(18) The following definitions apply for the purpose of this Procedure:

- a. Graduate Research output means any record that communicates or makes available the findings of Graduate Research. A research output may be in any form (hardcopy, electronic or other) of academic or public communication of the research from any stage of the research process (e.g. including but not limited to: Graduate Research proposals or thesis chapters, conference papers, reports, datasets or journal articles).
- b. iThenticate means a text-matching tool which enables a comparison of Graduate Research Outputs with an extensive database of existing research and academic literature and varied web sources in order to identify potential instances of Plagiarism.
- c. Plagiarism means adopting or reproducing the work or ideas of another person, whether intentionally or not, and presenting this as one's own without clearly acknowledging the source of the work or ideas.

Status and Details

Status	Current
Effective Date	24th March 2026
Review Date	24th March 2031
Approval Authority	Academic Senate
Approval Date	24th March 2026
Expiry Date	Not Applicable
Responsible Executive	Sakkie Pretorius Deputy Vice-Chancellor (Research) +61 2 9850 8645
Responsible Officer	Simon Handley Pro Vice-Chancellor, Graduate Research +61 2 9850 8030
Enquiries Contact	Jennifer Cornish Academic Director, Graduate Research +61 2 9850 8666
